COMORN, VA., Jan. 1.—It is understood that a delegation of King Georgians will appear before the Rivers and Harbors Committee of Congress, in Washington, at an early day in this New Year, and urge the immediate passage of a bill authorizing and providing for the dredging and deepening of upper Machodoc Creek, in this county. Tais creek is half a mile wide, and is one of the most important tributaries of the Potomac River. It is situated in one of the most fertile and prosperous sections of the county, and there are many mercantile establishments, a canning factory and several excellent wherves along its shores. For many years the Potomac Macanese bandled, a large feeleght in the mercantile establishments, a canning factory and several excellent wharves along its shores. For many years the Potomac steamers handled a large freight in upper Machodoc, but the channel of the creek lins been-filling up for some time past, so that it is not navigable for the steamber its high enough for the shipment of the heavy freight. It is known that Congressman John F. Rixey will do all in his power to get an appropriation for the improvement of Machodoc, and the people of that section are guite sanguine about it. The people in this section of the State, who have given thought to the subject are enthusiastically in favor of the Torrens system of land registration, and earnestly hope that the Legislature will pass an act this winter adopting that system in Virginia.
